

COMPANY UPDATE

Avira Resources Limited (ASX: **AVW**) (**Avira** or the **Company**) wishes to announce that it has now received all approvals necessary to commence the drilling program announced on 20th February 2018.

Proposed Exploration Program at Gettysburg

As advised in February's announcement the minerals exploration contractor Terra Search Pty Ltd has been engaged along with Hammer Earthmoving and Eagle Drilling to facilitate a series of drill holes at the Gettysburg prospect within EPM 12887 at the Company's Pyramid Gold Project in northern Queensland.

Completion of the site-works and commencement of drilling

The Company is currently finalising site access remediation of drill pads and drill rig mobilisation to facilitate commencement of the program in mid March 2018 with drilling now to commence on or around the 20th March subject to favourable weather conditions.

Whilst contractors including earth moving, drilling and geological services have been engaged, the commencement of remedial earthworks, rig mobilisation and commencement of drilling currently planned for mid March all remain weather dependent.

Activity	Date	Status
Notification and approvals from Native Title Group, Department and Landowners	28 th February	Completed
Engagement of drilling contractor & Earthmoving contractor	5 th March	Completed
